New Marks,
Clearer Compliance

New SRCC Certification and Listing Marks

The Solar Rating and Certification Corporation ([ICC-SRCC](#)) is pleased to announce new versions of its marks for its certification and listing programs to better align with federal, state, and local regulations and to provide greater efficiency, flexibility and clarity for certificate and listing holders.

Two New Marks: "RATED" and "LISTED"

"RATED": This mark represents products with proprietary, third-party performance ratings and is used for SRCC certifications under *any* OG-titled programs (OG-100, OG-300, and the upcoming OG-500).

"LISTED": SRCC listings will make use of this new mark to indicate compliance of products with one or more codes or standards and do not include performance ratings.

Starting September 19, 2024, all new SRCC certifications and listings will be issued with these marks. Current clients can switch to the new marks or continue using the existing marks until 2026.

Why the Change?

The new marks provide clarity and flexibility for SRCC clients:

- **Performance Ratings:** The "RATED" mark aligns with the [Federal Inflation Reduction Act \(IRA\) tax credit](#) requirements for solar water heaters and clearly shows that the product is provided with a performance rating, ensuring your products stand out in the market.

- **Universal Application:** The “RATED” mark can be used across multiple OG programs (OG-100, OG-300, OG-500), reducing redundant labeling and saving space and resources on labels and materials.
- **Cost-Effective for Listings:** The “LISTED” mark simplifies the process of showing compliance with multiple codes and standards and multiple product models in one document. This is a cost-effective way of showing compliance where a rating is not needed.
- **Future-Ready:** These new marks also pave the way for future SRCC certification and listing programs, enabling us to expand our offerings and provide seamless support for future growth opportunities.

Transition Details

- New SRCC certifications and listings will be issued using the new mark beginning **September 19, 2024**.
- Existing certification and listing holders can continue to use the current marks through **2026**.
- Existing certifications under the [OG-400](#) program (which do not include performance ratings) will automatically transition to the [Listing Program](#) and use the new "LISTED" mark.
- The new marks will be featured on existing certification and listing documents **commencing in 2025**.
- An updated logo and marks style guide is available [here](#).
- Both the new and current marks are available by request in various formats.

If you have any questions or need support during this transition, please reach out to us at any time.
